

# ServiceDesk – Customer Support Ticket Management System

The image displays three screenshots of the ServiceDesk CRM interface, a Customer Support Ticket Management System. The interface is designed for managing customer support tickets and includes a sidebar with navigation options and a main content area with various dashboards and reports.

**Screenshot 1: Ticket Categories (Case Taxonomy)**

This screenshot shows the 'Ticket Categories (Case Taxonomy)' dashboard. It features a search bar at the top and a sidebar with navigation options. The main content area displays a grid of ticket categories, each with a description and a count of associated cases.

| Category        | Description                                                                                  | Associated Cases   |
|-----------------|----------------------------------------------------------------------------------------------|--------------------|
| Technical Issue | Bugs, system errors, API exceptions, and system performance anomalies.                       | 6 Associated Cases |
| Billing         | Invoice discrepancies, subscription renewals, refunds, and payment gateway issues.           | 5 Associated Cases |
| Account         | Account organization settings, user role access, SSO provisioning, and team onboarding.      | 3 Associated Cases |
| Login           | Multi-factor authentication kiosk, forgotten passwords, and SSO session errors.              | 2 Associated Cases |
| Product         | General product inquiries, workflow tutorials, configuration assistance, and request queues. | 3 Associated Cases |
| Feature Request | Customer suggestions, custom workflow enhancements, and new integrations, etc.               | 3 Associated Cases |
| Other           |                                                                                              |                    |

**Screenshot 2: ServiceDesk CRM Operations Dashboard**

This screenshot shows the 'ServiceDesk CRM Operations Dashboard'. It features a search bar at the top and a sidebar with navigation options. The main content area displays a grid of key metrics and a list of urgent attention queue items.

| Metric           | Value | Description               |
|------------------|-------|---------------------------|
| TOTAL TICKETS    | 20    | All recorded cases        |
| OPEN TICKETS     | 5     | New & Unassigned cases    |
| IN PROGRESS      | 7     | Active investigations     |
| RESOLVED         | 4     | Pending customer sign-off |
| CLOSED           | 4     | Acknowledged & Completed  |
| CRITICAL         | 3     | Requires 4h SLA handling  |
| OVERDUE          | 2     | SLA deadline breached     |
| AVAILABLE AGENTS | 4 / 1 | Ready for case-handling   |

**Urgent Attention Queue (Critical or Overdue)**

| ID        | Subject                                                                 | Priority          | Actionable Item     |
|-----------|-------------------------------------------------------------------------|-------------------|---------------------|
| TICK-2001 | Production API returning HTTP 504 Gateway Timeout during batch s...     | Critical Priority | Deploy Hotfix v2.0  |
| TICK-2003 | SSO Okta SAML signature validation failed for entire engineering tea... | Critical Priority | Restart SSO Service |
| TICK-2006 | Warehouse barcode scanner websocket disconnects intermittently          | SLA Exposed       | Reboot Scanner      |
| TICK-2011 | Database connection pooling exhaustion during scheduled exports         | Critical Priority | Restart Export      |
| TICK-2012 | Tax exemption certificate renewal pending review                        | SLA Exposed       | Clear Ticket        |

**Screenshot 3: Tickets by Status and Priority**

This screenshot shows the 'Tickets by Status' and 'Tickets by Priority' dashboards. The 'Tickets by Status' dashboard displays a horizontal bar chart showing the distribution of tickets across different statuses. The 'Tickets by Priority' dashboard displays a grid of priority levels with their respective counts.

| Status               | Count | Percentage |
|----------------------|-------|------------|
| New                  | 4     | 14%        |
| Open                 | 4     | 14%        |
| In Progress          | 6     | 21%        |
| Waiting for Customer | 6     | 21%        |
| Resolved             | 6     | 21%        |

| Priority | Count | Percentage |
|----------|-------|------------|
| CRITICAL | 3     | 15%        |
| HIGH     | 6     | 30%        |
| MEDIUM   | 5     | 25%        |
| LOW      | 6     | 30%        |

# ServiceDesk – Customer Support Ticket Management System

A detailed list of support tickets, each with a unique ID, subject, assigned agent, status, and priority. The list includes actions for resolving, closing, or reopening tickets.

| ID       | Subject                                                  | Assigned Agent | Status               | Priority | Action |
|----------|----------------------------------------------------------|----------------|----------------------|----------|--------|
| TIX-1887 | Cannot update VAT identification number in billing...    | Marion Chen    | Resolved             | Medium   | Reopen |
| TIX-1888 | Tax exemption certificate renewal pending review...      | Marion Chen    | Waiting for Customer | Low      | Close  |
| TIX-1889 | Please see checked latency spikes in Europe region...    | David Kim      | Closed               | High     | Reopen |

# ServiceDesk – Customer Support Ticket Management System

# ServiceDesk – Customer Support Ticket Management System

The screenshot displays the ServiceDesk CRM Automated Test Suite interface. The top navigation bar includes a search bar, a 'Salesforce Guide' button, a 'Role Admin' dropdown, and a 'New Ticket' button. The left sidebar contains navigation links for Dashboard, Tickets (Cases), Customers (Accounts), Support Agents, Ticket Categories, Reports & Analytics, and Settings & Testing. The main content area shows a table of 18 test scenarios, each with a unique ID, a test scenario name, a category, a status, and an assertion details column. A 'Run All 18 Test Cases' button is located in the top right corner of the table area.

| ID | TEST SCENARIO NAME                             | CATEGORY          | STATUS            | ASSERTION DETAILS                              |
|----|------------------------------------------------|-------------------|-------------------|------------------------------------------------|
| 1  | Environment Creation Validation                | Validation        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 2  | Duplicate Email Validation Rule                | Validation        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 3  | Support Agent Record Integrity                 | Validation        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 4  | Ticket Master Detail & Lookup Integrity        | Integrity         | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 5  | Required Field Validation Rule                 | Validation        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 6  | SIA Calculation Engine: Critical Priority (CR) | SIA Engine        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 7  | SIA Calculation Engine: High Priority (HR)     | SIA Engine        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 8  | SIA Calculation Engine: Medium Priority (MR)   | SIA Engine        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |

| 10 | Automated Case Assignment Rule (Email Channel) | Automation & Flow | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 11 | Workflow Rerouting Routing Logic               | Automation & Flow | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 12 | Status Lifecycle Work Flow Validation          | Lifecycle         | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 13 | Mandatory Resolution Notes Rule on Resolved    | Validation        | Pending Execution | Click "Run All 18 Test Cases" above to verify. |
| 14 | Ticket Recurrence Lifecycle Rule               | Lifecycle         | Pending Execution | Click "Run All 18 Test Cases" above to verify. |

The bottom screenshot shows the 'Salesforce CRM Concept Architecture Guide' modal. It provides a portfolio note and details about the entities and relationships in the system. The entities include Customer Entity, Ticket Entity, Support Agent Entity, and Ticket Assignment Automation. The relationships include Object Relationships and Status Transitions & Validation.

**Salesforce CRM Concept Architecture Guide**

How ServiceDesk implements core Salesforce Service Cloud principles

**Portfolio Note:** This application is custom-built to demonstrate practical understanding of Salesforce CRM architecture. Each module maps directly to Salesforce Admin and Developer competencies.

- Customer Entity**  
Salesforce: Account & Contact Standard Objects  
Stores business client details, industry, and contact coordinates. Represents the account hierarchy in Salesforce (Service Cloud).
- Ticket Entity**  
Salesforce: Case Standard Object  
The core transactional support record with Subject, Description, Priority, Status, SIA Due Date, and Resolution Notes.
- Support Agent Entity**  
Salesforce: User & Service Resource (Email Channel)  
Support personnel categorized with Departments, Skill certifications, and the capacity/workload limits.
- Object Relationships**  
Salesforce: Lookup & Master Detail Relationships  
Tickets create Lookup references to Customer (Account), Assigned Agent (User/Resource), and Category (Custom Related Object).
- Ticket Assignment Automation**  
Salesforce: Case Assignment Rules & Salesforce Flow  
Automatically analyzes category skill and agent availability to route.
- Status Transitions & Validation**  
Salesforce: Support Process, Path & Workflow Rules  
Enforces proper Workflow Flow Step -> Open -> In Progress ->
